IEEE Standard VHDL Analog And Mixed-signal Extensions: Packages For Multiple Energy Domain Support

by IEEE Computer Society; Institute of Electrical and Electronics Engineers; American National Standards Institute; IEEE-SA Standards Board; IEEE Xplore (Online service)

of multiple energy domain systems. The range of VHDL-AMS language is designed to support "mixed-signal" systems The packages proposed in IEEE standard 1076.1.1 were .. "Definition of Analog and Mixed-Signal extensions to IEEE. Dec 23, 1999 . Abstract: This standard defines the IEEE 1076.1 language, a hardware many abstraction levels in electrical and lectrical energy domains. The extension of VHDL to support analog and mixed-signal systems began in In addition, several subcommittees were .. Subprograms and packages.
